Grattan’s work has influence

“In recent years Grattan Institute has emerged as one of the most important think-tanks in Australia. Its forte is evidence-based work, a wide lens and a keen eye for priorities.”

Paul Kelly, Editor-at-Large, The Australian 12 June 2012

“The report offers a much more sensible view of the Australian economy than present in the Commission of Audit. It also did not require the government having to spend $2.5m to get it”

Greg Jericho
The Drum, May 2014

“Economic think tanks of the excellence of Grattan Institute…”

Tony Shepherd, President, Business Council of Australia and Chairman of the Commission of Audit. ABC Radio National June 2012

John Daley
CEO
“Grattan does independent, rigorous and practical work to improve Australian public policy. We base our findings on the facts, and discuss them in a compelling way with decision-makers and the public.”

John Daley, who has worked for ANZ and McKinsey, is one of Australia’s leading public policy thinkers, with 25 years experience in the public, private and university sectors.
**Program Directors**

“Rising health costs capture headlines but they can be contained, and we can create a better health system while doing so.”

Stephen Duckett
Health

“Australia’s universities have more students than ever before. We need to find ways to teach them well at an affordable cost.”

Andrew Norton
Higher Education

“As our cities and freight networks expand, the distance between jobs and population centres grows, we desperately need transport that better serves the economy and people.’”

Marion Terrill
Transport

“Australia is redesigning its energy systems for a low-carbon, high-growth world. Grattan provides durable policy solutions for a market economy facing fundamental change.”

Tony Wood
Energy

“We need to define what outcomes we want from schools, and help young Australians develop the skills, knowledge and personal capabilities needed to thrive in a digital world.”

Peter Goss
School education

“A once-in-a-century mining boom has reshaped the entire economy, producing new winners and losers. Productivity performance matters more than ever in building a powerful, agile economy for a new century.”

Jim Minifie
Productivity Growth

---

Stephen Duckett is one of Australia’s leading health economists, and a former Secretary of the Commonwealth Department of Health.

Andrew Norton advised former Education Minister David Kemp and University of Melbourne Vice-Chancellor Glyn Davis. He co-wrote the 2014 Review of the demand-driven higher education system.

Marion Terrill has extensive experience in the Commonwealth public service. She helped to write the 2010 Henry Tax Review, and also worked as Director of Policy at the Business Council.

Tony Wood worked at Origin Energy for 11 years, and was an adviser to the first Garnaut climate change review.

Dr Peter Goss has over 10 years experience as a strategy consultant, advising Federal and State governments on service delivery innovation.

Dr Jim Minifie is a former Chief Economist at Boston Consulting Group.
The Board

Alex Chernov AC
QC Chairman
Australian jurist and was Governor of Victoria 2011 to 2015

Chief Executive Officer, BHP Billiton

Dr Ian Watt AO
Former Secretary, Department of the Prime Minister and Cabinet

Peter Scanlon
Chairman, Taverners Group and the Scanlon Foundation

Geraldine Doogue
Journalist and broadcaster

Chris Eccles
Secretary of the Department of Premier and Cabinet, Victoria
Six of the best: reports that changed the debate

The global gas revolution is poised to create a huge Australian gas industry and big price rises for consumers.

The knowledge-intensive economy is reshaping our cities and leaving too many residents too far from jobs.

Australia pays $1.3 billion a year too much for prescription drugs. It’s time to get tough with drug companies.

The centre of high performance in school education is now East Asia. Studying these systems can improve our children’s lives.

Australians pay up to three times more than they should in superannuation fees. Change could save them $10 billion a year.

Rising health, pension and infrastructure spending will force governments to find $70 billion a year by 2024 to balance their budgets.

“Thought leaders on urban issues such as the Grattan Institute”
The Hon Malcolm Turnbull MP, Prime Minister, 18 September 2014

“Andrew Norton has made the Grattan Institute higher education reports compulsory reading for Ministers of Education and their staff, Vice Chancellors, and the education media”
Professor Warren Bebbington Vice-Chancellor, University of Adelaide October 2013

“The best analysis I have seen on avoidable costs, pricing, activity based funding in the current hospital landscape”
Rob Mathie, Assistant Auditor-General of New South Wales, on Grattan’s report, Controlling costly care: a billion-dollar hospital opportunity, March 2014
What you get out of Grattan

Influencing policy makers and the public

Grattan regularly holds Chatham House Rule events with policy makers, affiliate representatives and other stakeholders to discuss policy issues, often in the context of Grattan work in progress or after publication.

Grattan seeks to engage the widest possible audience. Speakers at our public forums include Ministers, public servants and leaders from the academic and private sectors. More than 16,000 people receive regular email bulletins on our activities.

Affiliate Benefits

Grattan Institute tailors its programs to the needs and interest of each affiliate. We recognise three levels of affiliate support.

Businesses, and other organisations, can benefit directly from their affiliation with Grattan Institute. Our staff can assist the strategy-making of boards and senior management teams by providing a view of emerging public policy directions and how they might affect an affiliate’s particular business or service.

Grattan staff are drawcard presenters for clients, customers and stakeholders interested in thoughtful and informed policy discussions. Corporate affiliates have privileged advance notice of Grattan’s future research and publications so they can plan events straight after publication.

Grattan affiliates are invited regularly to private discussions over lunch and dinner with Grattan Institute visitors, staff and board members. Their views on Grattan’s future research directions are sought and valued.

Grattan recognises the support of its affiliates in all its publications, on its website, and at public events. This support is vital to helping Grattan Institute improve public policy to make Australia a better place for its people and businesses.

“The Grattan Institute’s forensic analysis… demonstrates that only a carbon price through a market mechanism will cut pollution without excessive cost to the economy or taxpayer”

Greg Combet
then Minister for Climate Change, 7 April 2011

“Jim Minifie, an economist at the Melbourne-based Grattan Institute, one of the leading voices calling for change, welcomed the report. “The case for superannuation reform is compelling…” said Mr Minifie.”

Chris Flood,
London Financial Times, July 20 2014
Independent, rigorous, practical

We are independent, taking the perspective of the Australian public interest rather than any interest group, and we avoid commissioned work to ensure this independence. We are rigorous in obtaining the best available evidence from published work and collecting and analysing our own data. We are practical in articulating what governments should do to improve the lives of all Australians.
